813-1
On December 18, 1958, Mr. Bartlett of the Liaison Section attended a meeting of the Interagency Planning Group at the Office of Civil and Defense Mobilization (OCDM). Mr. John Grady of OCDM acted as chairman of this Group. The attached discussion paper was handed to the members of this Group and a discussion followed.

The 1959 plans call for the exercise to be conducted in four phases set out as follows:

Phase I, a nationwide civil defense alert drill, April, 1959. This will include public participation along with the state and local civil defense organizations.

Phase II, Government Phase, regional, state and local - May and June, 1959. Individual regional exercises will include the participation of the operating staffs of state and local civil defense organizations and federal regional activities.

Phase III, Federal review and evaluation of regional exercise. During July-August, 1959, seminar reviews and evaluation of the regional exercises will be conducted at HIGHPOINT, the OCDM relocation site by Departmental representatives of agencies having responsibility for non-military defense plans.

Phase IV, Federal relocation exercise will be scheduled for either October or November, 1959. The relocation arc at Departmental level will be activated for a period of ten days and all agencies will carry out their non-interruptable, essential functions from their relocation sites.

Mr. Bartlett, who attended this meeting, did not make any comments; however, the representatives of various agencies literally tore the Phase IV aspect apart. The chairman indicated that Phase IV was set up after the President commented at the September 26, 1958, Cabinet meeting which was in the form of an OCDM briefing for him that the 1959 test should be longer than the 1958 test and that it should be held in either October or November rather than during the summer.

LIAISON

Memorandum Mr. Roach to Mr. Belmont
RE: OPERATION ALERT 1959

The Department of Defense representative said that the President is an understanding man and rather than going ahead with a plan that is not feasible, the President should be told that this test is not feasible. The State representative indicated that it would be impossible for State to conduct its essential functions from a relocation site such as receiving foreign visitors and issuing passports at the site. Other persons in attendance commented that the test would be very costly and that with the economy program on, their agencies did not have the money to participate.

The meeting ended with Mr. Grady of OCDM saying that another look would be taken at this Phase IV and that this meeting was only to obtain reaction from the agencies. Another meeting will be held in January, 1959, and you will be advised of the results.

On January 22, 1959, Mr. Bartlett of the Liaison Section attended a meeting of the Interagency Planning Group at the Office of Civil and Defense Mobilization (OCDM). Mr. John F. Grady of OCDM was chairman of this meeting. There is enclosed for information purposes a revised draft of the program memorandum dealing with Operation Alert 1959. Mr. Grady advised that there will be another meeting of this group on Thursday, January 29, at which time they will hand out the basic directive for Phase I of the test which is the civil defense alert exercise to be held April 17 and 18, 1959. There will be no Bureau participation in this Phase. Mr. Grady also advised that at the meeting on January 29, he will furnish an outline for the annex dealing with Phase II which is the government phase. The participants are state and local civil defense staffs, regional and field organizations of federal agencies, and the OCDM national and operational headquarters. Upon receipt of these documents, they will be evaluated and you will be advised of the details.

As presently set up, the plan calls for Phase IV which is the national relocation exercise scheduled to take place October 16-24, 1959. In previous years this federal relocation has taken place during the middle of the summer. Representatives of departments attending the meeting, including Defense, Agriculture, Interior, and Commerce, spoke out in very strong terms to the effect that the federal relocation phase not only is impractical but it is impossible. These representatives, supported by representatives of other agencies, demanded to go on record that their agencies were against this phase as it is now set up. Some of the comments were: (1) It is too long (2) Impossible to use the present relocation sites which are located on college campuses and (3) It would cost too much.

The meeting ended by the chairman indicating that he would make known the objection by many of the departments to the relocation phase and they would further consider the problem and present it again.

On January 29, 1959, Mr. Bartlett of the Liaison Section attended a meeting of the Interagency Planning Group, Office of Civil and Defense Mobilization (OCDM). Mr. John Grady of OCDM was Chairman of this meeting. You have previously been advised of the discussions of the Interagency Planning Group concerning the proposed Operation Alert 1959, together with the fact that most of the agencies involved were outspoken against it. Previous proposals called for the test to be run for ten days in October, plus the utilization of the existing relocation sites. Many of these relocation sites are colleges which, during that time of the year, are to be used for college purposes. Another strong point against a full scale test for a period of ten days was the cost.

The OCDM proposal, which was made at the January 29, meeting, called for a National Relocation Exercise to be held in Phase III with activation of the relocation sites to occur on August 24, 25 and 26, 1959. The evaluation groups would meet at HIGHPOINT, OCDM relocation site, on August 27 and the heads of agencies would meet in an expanded Cabinet meeting on August 28, 1959, to consider the final evaluation report. In the past, the Director has been invited and has attended these expanded Cabinet meetings.

The second OCDM proposal called for an 8-day test to be held from October 16 through October 23, 1959. The participation calls for the heads of agencies with necessary supporting personnel to conduct current normal policy, direction and control of the departments and agencies and principal bureaus thereof. These persons would function from existing protected facilities. The operation of the Federal Government will be directed from these sites and these sites will be "buttoned up" for this period.

Needless to say, much heated discussion took place following these announcements and much of the discussion was in protest. Criticism was made for having two tests rather than one. The Department of Defense member stated that the October test was "worse than useless;" that it was a far cry from existing Department of Defense plans which call for the Service secretaries to relocate at widely disbursed sites. On the other hand, the Commerce member stated that he believed the

LIFE

Memorandum Mr. Roach to Mr. Belmont
RE: BUPLANS - OPERATION ALERT 1959

Secretary of Commerce, with his assistant secretaries, heads of bureaus and a staff of 50 people, will be willing to operate from a "buttoned up" site for the entire 8 days.

The existing protected facilities are, Camp David, which will be used by the White House; the Atomic Energy Commission underground site in connection with their building in Germantown, Maryland; Raven Rock, located in Maryland near the Pennsylvania line, assigned for use by the military; and HIGHPOINT, the OCDM site. It was indicated that if the President approved this plan practically all of the persons to be relocated would go to HIGHPOINT to work and live for the entire 8 days. Most of this site is actually underground in the side of a mountain. Communications would be extremely limited. There are no teletype circuits and only forty telephone circuits. The working space underground at the present moment has no telephone communication.

The October test appears to be an asinine approach to the problem of testing the operations of Government from a relocation site. Practically all of the Government leaders with their assistants would be herded together at HIGHPOINT for 8 full days without being able to leave the site. Limited communications would make it almost impossible to communicate with their offices in Washington which would be carrying on normal business operations.

Mr. Grady reminded the members that the September 29, 1958, record of action following the September 23, 1958, Cabinet meeting recorded that the President requested a realistic 10-day test to be held after October 15, so that there would be no Congressional conflict.

OBSERVATIONS:

Discussions concerning the proposed test will continue and you will be advised of the developments. It is believed that if the President approves the existing proposal, consideration should be given to the Director advising the Attorney General that the FBI will not participate in Operation Alert 1959, October phase.

ACTION:

For information. You will be advised of developments.

On February 5, 1959, Mr. Bartlett of the Liaison Section attended a meeting of the Interagency Planning Group at the Office of Civil and Defense Mobilization (OCDM). Mr. John F. Grady of OCDM was Chairman of this meeting. The problems involved in the "National Relocation Exercise" were discussed. This test calls for the relocation of the Federal agencies at their own sites on August 24, 25 and 26. This will be followed by a two-day seminar of the evaluation groups at the OCDM relocation site, HIGHPOINT, on August 27 and 28. Concerning this point, Mr. Grady mentioned that some consideration is being given to the elimination of the Government agencies other than resource agencies from this August relocation. If this takes place, the Bureau will not have to relocate in August.

Concerning the October phase of the test, where the heads of agencies, with their supporting staffs, will operate from protected sites, such as HIGHPOINT and Raven Rock, Mr. Grady indicated that this time has now been cut to 5 days October 19-23, 1959. No firm commitments have been made on either the October or August tests. Liaison will follow this matter and you will be advised of the developments.

SUBJECT: DEFENSE PLANS - OPERATION ALERT 1959

On 3-2-59 Supervisor Minnich, Defense Plans Desk, attended a meeting of the Interagency Planning Group (IPG) at Office of Civil and Defense Mobilization (OCDM). Mr. John F. Grady, OCDM, was chairman of the meeting. He pointed out that at the Cabinet meeting 2-27-59, Phase 3, the National Relocation Phase of Operation Alert 1959 (O/A 1959) was approved for the days August 24, 25, and 26, 1959. In regard to Phase 4, which was tentatively scheduled as the October Phase of O/A 1959 when the heads of agencies with supporting staffs are supposed to operate from protected sites, the President, according to Grady, said he would like to reconsider this phase. According to Grady, the President wants to give it a little more thought and it will be resubmitted to the Cabinet in the future.

The meeting was very short and the only other item of note was that in connection with the Regional Phase, July 8-10, 1959, it is expected that all regional or field offices of agencies having relocation sites will be required to activate their sites.

On 2/19/59 Supervisor Minnich, Defense Plans Desk, attended a meeting of the Interagency Planning Group (IPG) at Office of Civil and Defense Mobilization (OCDM). Mr. John F. Grady, OCDM, was chairman of the meeting. He pointed out plans for Operation Alert 1959 (O/A 1959) have not received Cabinet approval as yet since the 2/13/59 Cabinet meeting was canceled; however, OCDM hopes to receive Cabinet approval on 2/27/59. He pointed out they are going to go ahead and print up a limited number of Standards for O/A 1959 which they will disseminate to members of the IPG on or about 2/23/59.

Discussions at the meeting centered primarily around four drafts: namely (1) a proposed schedule for a traveling survey team during O/A 1959; (2) Standards for O/A 1959; (3) Annex II to the Standards, pertaining to plans and programs for the local, state, and regional phases of O/A 1959; and (4) Part A to Annex 2, pertaining to resources management.

OBSERVATIONS:

Regarding the survey team, since all indications point to a resources management type exercise, it is doubtful we will be requested to furnish a representative to this team. The Standards for O/A 1959 only pertain to the civil defense alert exercise to be held 4/17-18/59, the local civil defense phase on 5/8-9/59, the state civil defense phase on 6/4-5/59, and the regional civil defense phase on 7/8-10/59. No reference is made to the national relocation exercise (according to previous information this is tentatively scheduled for August 24-26, 1959. Of the foregoing phases, the only one that will eventually pertain to us is the regional phase in July and the manner in which it is stated it will only pertain to our field installations. However, since indications are for a resources management type exercise, it is entirely possible, if deemed desirable, that we can seek OCDM approval for nonparticipation by our field divisions. Consideration of this matter at this time would be premature until OCDM issues the final Standards for O/A 1959.

Memorandum Roach to Belmont
RE: DEFENSE PLANS -
OPERATION ALERT 1959

The only other item of note in the draft Standards and draft annexes is the fact that the attack data from O/A 1958 will be used for damage analysis purposes which indicates that the Laboratory will probably not have to conduct an analysis of such data for O/A 1959.

The next meeting of the IPG is scheduled for March 2, 1959.

ACTION:

None. You will be kept advised.

"Standards for Operation Alert 1959" (O/A 1959) received from Office of Civil and Defense Mobilization (OCDM) 2-26-59, a review of which denotes O/A 1959 calls for a series of exercises as follows: (1) Civil Defense Alert Exercise, April 17 and 18, 1959, with local, state, and personnel of Federal agencies participating as appropriate at the local level. This is similar to last year's Attack Phase and at most should only require our field offices to participate in curb or shelter drills to the extent permitted by the normal operation of the office. (2) Local, State and Regional Exercises. (a) Local Phase, May 8 and 9, 1959 - Post-Attack Period D to D+14 (time of attack to 14 days after), with local civil defense personnel and Federal agency personnel concerned or having responsibilities at the local level participating. This should not require any participation by our field offices. (b) State Phase, June 4 and 5, 1959 - Post-Attack Period D to D+30, with state headquarters civil defense personnel, Federal agency personnel concerned or having responsibilities at state level, local directors and OCDM regional personnel participating. This should not require any participation by our field offices. (c) Regional Phase, July 8, 9, and 10, 1959 - Post-Attack Period D to D+30 or longer. Regional and field organizations of Federal agencies and state directors will participate and each OCDM region will coordinate. Each OCDM region is to prepare exercise guides and conduct regional exercise based on broad standards issued at the national level.

Over-All Observations:

Exercise this year primarily revolves around resources management problems. The Regional Phase in July is the one which we would normally participate in; however, this year it is planned on a regional basis with Seat of Government relocation sites (R/S) in the National Arc not being activated during Regional Phase. Field offices who participate would have to do so on their own under exercise standards devised by each of eight OCDM regions. Memorandum Roach to Belmont 2-6-59 pointed out that John Grady, OCDM, chairman of the Interagency Planning Group meetings, at meeting on 2-5-59, mentioned that some consideration was being given to elimination of Government agencies, other than resource-type agencies, from the August Phase (activation of R/S in Seat of Government Arc). It appears propitious to contact Grady, pointing out our emergency responsibilities

and the fact we have, in the field and at Seat of Government, actively participated and tested our responsibilities in previous O/A exercises. However, planning, phasing, and objectives of O/A 1959 indicate a desirability to preclude our field offices from participating in the Regional Phase in July, except for the possibility of furnishing Agents in a liaison capacity to OCDM regional headquarters. If Grady accedes to exclusion of participation by our field offices, we should determine what bearing this will have on our participation in the National Phase, which will probably occur in August and which is to be announced, and it may logically follow that we will not be required to participate in it.

RECOMMENDATION:

Liaison contact John Grady, OCDM, pointing out that the planning, phasing, and objectives of O/A 1959 indicate a desirability for excluding our field offices from participation other than furnishing liaison personnel to OCDM regional headquarters if requested. Also, to determine status of planning for National Phase in August and possibility of agencies, other than resource-type agencies, being excluded from participating in it.

"Standards for Operation Alert 1959" (O/A 1959) received from Office of Civil and Defense Mobilization (OCDM), a review of which denoted O/A 1959 calls for a series of exercises as follows: (1) Civil Defense Alert Exercise, 4-17 and 18-59. This is similar to last year's Attack Phase, and Seat of Government (SOG) and the field will only be required to participate in curb or shelter drills to the extent permitted by normal operations. (2) Local, State, and Regional Exercises. (a) Local Phase, 5-8 and 9-59, and (b) State Phase, 6-4 and 5-59, neither of which require any actions or participation by SOG or the field. (c) Regional Phase, 7-8, 9, 10-59, according to the standards, regional and field organizations of Federal agencies, and State directors are to participate with each OCDM region coordinating.

OBSERVATIONS:

O/A 1959 primarily revolves around resources management problems; the Regional Phase, 7-8, 9, 10-59, is planned on a regional basis and SOG relocation sites in the National Arc are not being activated during this phase. Field offices, to participate, would have to do so on their own, under exercise standards devised by each of eight OCDM regions. Since the planning, phasing, and objectives of the regional phasing indicated a desire to preclude our field offices from participating in it, except for the possibility of furnishing Agents in Liaison capacity to each of the eight OCDM regions, with your approval, OCDM was contacted. On 3-11-59, Supervisors Bartlett and Minnich, Liaison Section, conferred with John Grady, Chairman, Interagency Planning Group, OCDM, regarding our participation in the regional phase. Grady very agreeably recognized the foregoing observations and advised our field offices would be exempted from participation in the regional phase except for the furnishing of Liaison men to the eight OCDM regional headquarters, if OCDM regional directors so desired. Grady, at this time, could not predict the effect this would have on our participation at SOG in the August National Relocation Phase as OCDM has not completed planning for it. He admitted OCDM realizes that approximately 40% of the Federal

RE: DEFENSE PLANS - OPAL '59

agencies, including FBI, are not provided for in the August National Relocation Phase. He said plans for the August Phase will be completed in the next two weeks. It does appear that our participation in the August Phase will probably be very limited, perhaps to just a skeleton communication staff and one Agent supervisor. In view of the foregoing, during the regional phase there is no need for intra-FBI test problems, for requirements (from Defense Plans standpoint) regarding the availability of SACs or ASACs, nor for restrictions on annual leave of key personnel at SOG or in the field.

RECOMMENDATION:

That attached SAC Letter be sent.

Subject: POINT AND SUMMARY PRINTOUT DATA

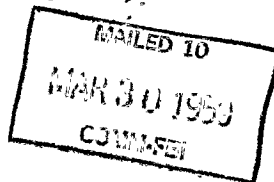

Reference is made to your letter dated March 23, 1959, advising that the same resource printout statistical data used in the 1958 Operation Alert exercise would be used during the 1959 exercise.

This Bureau has retained copies of the 1958 printouts and therefore it will not be necessary for Office of Civil and Defense Mobilization to rerun copies for our use.

NOTE: By letter dated 3-2-59 to OCDM, FBI Laboratory requested copies of printout data to be used during 1959 Operation Alert exercise. Referenced letter advised that same 1958 data would be used and that no reserve supply available. OCDM stated that if we no longer had copies, OCDM would reprint data. Supervisor J. F. Gallagher advised reprint not necessary as we have copies. (Laboratory)

MAIL ROOM

3/17/59
SAC LETTER NO. 59-15

(K) BUPLANS - OPERATION ALERT 1959 -- Operation Alert 1959 provides for a series of exercises as follows: ~~(S)~~ (U)

- (1) Civil Defense Alert Exercise - to take place on 4/17-18/59, with participation by the public, civil defense organizations, supporting personnel, and personnel of Federal agencies as appropriate.
- (2) Local, State, and Regional Exercises
- (a) Local Phase - to take place on 5/8-9/59, with participation by local civil defense and Federal agency personnel concerned or having responsibilities at the local level. (U) ~~(S)~~
- (b) State Phase - to take place on 6/4-5/59, with participation by state headquarters civil defense personnel and Federal agency personnel concerned or having responsibilities at the state level.
- (c) Regional Phase - to take place on 7/8-10/59, with participation by regional and field organizations of Federal agencies and the state civil defense directors.
- (3) National Relocation Exercise - to occur in August, 1959. The specific dates of this exercise are to be announced.

Under the planning and objectives of Operation Alert 1959, as set out by Office of Civil and Defense Mobilization (OCDM), under Phases (1) and (2) above, the only actions required by all field offices are as follows: ~~(S)~~ (U)

- (1) Under Phase (1) - Civil Defense Alert Exercise - if public participation, shelter, or curb drills are held in the field office area, you should participate only to the extent permitted by normal operations of your office.
- (2) Under Phase (2) - (a) Local Phase and (b) State Phase - no actions are required. With respect to (c) Regional Phase, OCDM headquarters has exempted FBI field offices from active participation in this phase, with the exception of the furnishing of Agents in a liaison capacity only to the eight OCDM regional offices. No intra-FBI test problems are contemplated, nor are there any requirements from a defense plans standpoint on the availability of Special Agents in Charge, Assistant Special Agents in Charge, or key personnel during the Regional Phase. The Bureau's relocation site will not be activated. (U) ~~(S)~~
- (3) Under the National Relocation Exercise, ~~as currently being planned, no actions will be required of field offices.~~ as currently being planned, no actions will be required of field offices.

Agent responsible for office defense planning, are to immediately contact the regional director of the respective OCDM regional headquarters with whom liaison was previously established. The OCDM regional directors should be advised that OCDM headquarters, Washington, D.C., has specifically exempted all FBI field offices from participating in the Regional Phase of Operation Alert 1959. It should be pointed out that if they desire, during the period 7/8-10/59, an Agent will be designated to be at the OCDM regional headquarters in a liaison capacity to represent the FBI in all matters which would normally come within FBI jurisdiction. If an Agent is designated for this purpose, you are to make certain he in no way reveals the existence of our emergency programs, nor is he to become involved in any of the regional planning or activity in connection with the exercise. (S) (U)

The results of the contacts should be promptly furnished to the Bureau and all SACs within the area of the respective OCDM regional offices. Thereafter, the Bureau and each field office should be advised of any pertinent developments regarding the Regional Exercise. Pamphlets or exercise documents should not be furnished to the Bureau or other field offices unless they have a direct relationship to the FBI or to FBI responsibilities, or require action by the Bureau, in which event any items transmitted should be thoroughly analyzed and accompanied by your recommendation as to the action to be taken. OFFICE MEMORANDUM

UNITED STATES GOVERNMENT

DATE: 3/30/59

TO: DIRECTOR, FBI(66-17380)
FROM: SAC, ATLANTA (66-1812)
SUBJECT: BUPLANS - OPERATION ALERT 1959.

Re SAC Letter 59-15 (K).

Pursuant to referenced SAC Letter I personally called on Mr. THOMAS H. GOODMAN, Director, Region 3, Office of Civil and Defense Mobilization, Thomasville, Georgia, on March 26, 1959, accompanied by SA ROYAL A. McGRAW, SRA at Thomasville, who has been designated as the direct liaison agent with the OCDM Regional Office at Thomasville.

During my meeting with Mr. GOODMAN I informed him that OCDM Headquarters, Washington, D. C., has specifically exempted all FBI field offices from participating in the Regional Phase of Operation Alert 1959. I also pointed out to him that if he so desired we would assign SA McGRAW to be at the OCDM Regional Headquarters in Thomasville during the period July 8-10, 1959, in a liaison capacity to represent the FBI in all matters which would normally come within FBI jurisdiction.

Mr. GOODMAN is extremely cooperative with this office and he raised no questions whatever about the fact that the FBI offices would not be participating in the Regional Phase of Operation Alert 1959. He expressed a desire to have SA McGRAW assigned to his headquarters in a liaison capacity during the period July 8-10, and this will be done. I informed Mr. GOODMAN that SA McGRAW, while assigned in this liaison capacity, would be representing all FBI offices within OCDM Region 3.

AT 66-1812

SA McGRAW has been instructed that during this assignment he is to in no way reveal the existence of any of our emergency programs, and that he is not to become involved in any of the Regional planning or activities in connection with the exercise, but is simply to act in a liaison capacity with respect to matters which would normally come within FBI jurisdiction. I have also instructed SA McGRAW that any pamphlets or exercise documents he receive should not be sent to the Bureau and other field offices unless they have a direct relationship to the Bureau or the FBI's responsibilities, or require some action by the Bureau, in which event he should transmit such items to me, so that they may be carefully analyzed and my recommendation submitted with respect to any action to be taken.

REC-10

66-19021-12

DEFENSE PLANS-OPERATION ALERT, 1959
 CIVIL DEFENSE ALERT EXERCISE
 APRIL 17 AND 18, 1959
 CONELRAD DRILL

The Office of Civil and Defense Mobilization has advised that, as part of the Civil Defense Alert Exercise, April 17 and 18, 1959, which is the beginning of Operation Alert 1959, a 30-minute CONELRAD (Control of Electromagnetic Radiation) drill will be held. The CONELRAD drill will begin at 11:30 A.M., E.S.T. on April 17, 1959, with the issuance of a simulated Air Raid Warning.

During the test all commercial AM, FM, and TV stations will cease broadcasting on their regular assigned frequencies. It is anticipated that AM stations participating in CONELRAD will shift to one of the CONELRAD frequencies (640 or 1240 kilocycles) for the purpose of broadcasting a national network program having to do with civil defense matters. Local civil defense volunteers will monitor 640 and 1240 kilocycles (the CONELRAD frequencies) and report to the Office of Civil and Defense Mobilization (OCDM) concerning the coverage and the quality of reception of the CONELRAD frequencies, inasmuch as civil defense information will be broadcast to the public on these frequencies during a bonafide emergency situation.

It will not be necessary for you to participate in the CONELRAD drill; your regular radio operations should continue as usual. No reports on reception of CONELRAD frequencies are being requested by the Bureau; however, it is pointed out that this drill offers an excellent opportunity for you to test the proper functioning of your CONALERT receiver, both as to its alarm feature when the regular broadcasts cease as well as its ability to receive civil defense information on the CONELRAD channels, 640 and 1240 kilocycles. It should be borne in mind that the primary function of the CONALERT receiver is to provide the warning when regular broadcasting ceases and that most field offices have much higher quality AM receivers available for monitoring the CONELRAD frequencies for the purpose of receiving civil defense information if such is desired.

quoted

A supply of documents captioned as above were received in the Liaison Section 4/15/59. Document is to support Exercise Federal Register being developed for guidance of Federal agencies including field establishments in the conduct of Operation Alert 1959 (O/A '59), and copies of it and the Exercise Federal Register which will be issued must be "retained until a replacement document is provided."

ANALYSIS OF DOCUMENT

Part I sets forth organizational responsibility under the National Plan for Civil Defense and Defense Mobilization. Part II sets forth operational guidance showing actions taken or to be taken at all levels of government. Part III pertains to operational assignments to Permanent and Emergency Federal Agencies. Page 9, paragraph 9 of this part sets forth Department of Justice responsibilities; and although the FBI is not mentioned, the part of interest to ~~us~~ reads "---participates in the functions of the National Security Council and its committees in all matters relating to the internal security of the nation; makes required investigations; administers and enforces all laws and regulations relating to the detention of dangerous persons; enforces laws relating to all subversive activities, including espionage, sabotage, treason, sedition, violations of the Atomic Energy Act of 1954 and investigations pertinent thereto---." This is identical to information included by Office of Civil and Defense Mobilization (OCDM) in previous documents of this type. Part IV sets forth basic Federal actions by Director OCDM, all of which pertain to resources and initial actions by other Federal agencies pertaining to Telecommunications, Food, Housing and Community Facilities, Industrial Production, Mobilization of Military Manpower, Minerals and Metals, Power and Fuels, Electric Power, Petroleum and Gas, Solid Fuels, Transportation, Health and Welfare, and Economic Stabilization.

Memorandum Roach to Belmont
RE: BUPLANS - POLICY AND OPERATIONAL
GUIDELINES FOR OPERATION ALERT 1959

OBSERVATIONS

The FBI is not mentioned in the document and since OCDM has exempted our field offices from participating in the regional or July phase of O/A '59, no over-all evaluation of the effects of these actions upon our resources - personnel and equipment - is necessary. Additionally, the actions are all similar to those involved in O/A '58 which were analyzed and considered by us last year.

Since the documents must be retained until a replacement document is issued and since the actions pertain to the primary responsibilities of the Administrative, Files and Communications and Laboratory Divisions, two copies are being sent separately to these divisions for retention. Two copies are being retained by the Defense Plans Desk, Liaison Section; and two copies are being placed on record in the files branch.

ACTION:

SUBJECT: DEFENSE PLANS - OPERATION ALERT 1959
DEPARTMENT OF JUSTICE INSTRUCTIONS TO
ALL UNITED STATES ATTORNEYS AND MARSHALS

On 5-4-59 James Canavan, Defense Plans Coordinator, Department of Justice, personally furnished Supervisor Minnich, Liaison Section, the attached departmental instructions dated 4-24-59 to all United States Attorneys and Marshals regarding their participation in Operation Alert 1959 (O/A 59).

The instructions are that because O/A 59 is largely an exercise in resource management "the activation of field relocation sites is optional as to Federal agencies which do not have responsibilities for resource management." It points out the Department has no such responsibilities and consequently it will not be necessary for United States Attorneys and Marshals to activate their relocation sites during O/A 59. It instructed them to offer fullest cooperation to state and local civil defense organizations or Federal agency field offices in the simulation of emergency actions or requests for information regarding exercise play. The instructions do not cover the proposed extent of departmental participation at the national level; however, Canavan advised he is making inquiry of the Office of Civil and Defense Mobilization and hopes to keep the departmental participation at a minimum.

On 5-12-59 Supervisor Minnich, Defense Plans Desk, attended a meeting of the Interagency Planning Group (IPG) at the Office of Civil and Defense Mobilization (OCDM). Mr. John F. Grady, OCDM, was chairman of the meeting. A great portion of the meeting was devoted to discussing the effectiveness of having agency representatives from IPG visit the OCDM regions during the Civil Defense Alert exercise phase, 4/17 and 18/59, of Operation Alert 1959 (O/A 59). A majority of the agency representatives present at the meeting favored similar teams to visit OCDM regions during the Regional Phase of O/A 59. Grady advised that appropriate requests from OCDM will be made to the various agencies for the furnishing of representatives for this purpose. We did not furnish a representative for the teams in April and probably will not be requested to do so in July.

Concerning the August National Relocation Phase, to take place 8-24, 25, and 26, -1959, Grady advised that it will be on a 17 relocation site concept which is the concept now approved by OCDM. It was determined that under this 17 site concept, we will retain Quantico as our relocation site and will not have to share it with any other agency. Under this concept, the Department of Justice will be required to give up its relocation site at Martinsburg, West Virginia, and it will be required to occupy space at Highpoint, OCDM's relocation site.

We have not received a document pertaining to the 17 site concept; however, Mr. Ed Cox of OCDM advised that one will be forthcoming in the immediate future.

Grady concluded the meeting by pointing out that another meeting will be held Tuesday, May 19, 1959, 2:30 p.m., Room 326, Winder Building, at which time working drafts will be

handed out pertaining to two areas of problem exercise play. One draft will pertain to the agencies involved in resources management and the other will pertain to intelligence type agencies, or those not having resource management problems. Form letter dated 4/17/59 from General Services Administration (GSA) advises as part of Operation Alert 1959 (O/A 59) it plans to develop requirements of Federal agencies from D day (day of attack) through 90 days after attack. In May or June, 1959, GSA regional officials plan to meet "with your field officials" to obtain information regarding space, supply, and transportation requirements for emergency operations. GSA Region 3 (Washington, D. C.) officials will meet with Seat of Government (SOG) representatives to discuss SOG requirements. Information sought will primarily concern the number of personnel required to perform essential functions and this will be related to requirements. GSA seeks our cooperation in this undertaking.

OBSERVATIONS:

We faced similar situations during Operation Alert 1958 when the Office of Civil and Defense Mobilization (OCDM) sought to send various type questionnaires to our field offices. After pointing out to OCDM that our defense planning is centralized; that the Bureau is able to handle any questionnaires pertinent to our field offices, singularly or totally, OCDM sent the questionnaires to the Bureau and instructed its regional offices not to seek the information from FBI field offices. It does not appear desirable to deviate from this policy and we should determine the specific information desired by GSA and advise GSA information pertinent to our field and SOG operations will be furnished by SOG. It should also be noted that OCDM has exempted our field from participating in the regional phase of O/A 59 in July.

Memorandum Roach to Belmont

RE: DEFENSE PLANS-OPERATION ALERT 1959
GENERAL SERVICES ADMINISTRATION
REQUEST FOR LOGISTICAL INFORMATION

RECOMMENDATION:

Liaison advise appropriate official at GSA that in view of our centralized defense plans and the exemption of our field offices from participating in the regional phase of O/A 59, all pertinent information required by GSA, regarding logistical requirements of our field offices and SOG, will be furnished by SOG. Also, if GSA has instructed its regional offices to contact our field offices, request it to rescind this action. Further, the specific logistical information GSA is seeking should be determined.

General Services Administration (GSA) form letter April 17, 1959, advised as part of Operation Alert - 1959 (O/A 59) it plans to develop requirements of Federal agencies from D Day (day of attack) through 90 days after attack. GSA officials plan to meet with FBI field officials in May or June, 1959, to get information regarding space, supply, and transportation requirements for emergency operations. GSA Region 3 officials will meet with Seat of Government (SOG) officials regarding SOG requirements. Data sought will primarily concern number of personnel required to perform essential functions and this will be related to requirements. Bureau cooperation sought in this undertaking.

Pursuant to recommendation in memorandum Mr. Roach to Mr. Belmont, April 24, 1959, Liaison Agent Fields discussed matter April 30, 1959, with Mr. Paul Foreman, Mobilization Planning Officer, GSA. Foreman was advised that in view of our centralized defense plans and exemption of our field offices from participation in the regional phase of O/A 59, all pertinent information required by GSA regarding logistical requirements of our field offices and SOG, will be furnished by SOG.

Foreman advised that he will communicate with GSA regions within next day or two instructing that no contacts with FBI field offices should be made regarding this matter, as it will be handled with SOG in Washington.

Foreman stated GSA planning is aimed generally at ascertaining of logistical support the agencies will require during first 90 days after attack. Such logistical support, similar to current GSA services, would involve transportation of materials; providing space; and providing Federal supplies, such as furniture and other equipment. Such requirements of GSA could be determined in great part, according to Foreman, from personnel plans of FBI. GSA would desire SOG to furnish statistical breakdown as to all personnel expected to be in duty status at each field office and at SOG as of D Day; D+30; D+60; and D+90.

MAY 20 1959

Memorandum Roach to Belmont

RE: DEFENSE PLANS-OPERATION ALERT - 1959
GENERAL SERVICES ADMINISTRATION
REQUEST FOR LOGISTICAL INFORMATION

Foreman stated the above are the only specific statistical needs he can suggest at this time, as tables of requirements have not as yet been fully developed by GSA planning officials concerned with transportation, space, and supplies. He advised it will be two weeks or more before this is completed. At this time, Mr. Murray Kramer, Mobilization Planning Officer for GSA Region 3, should be able to advise what other specific data would be desired from SOG. Foreman stated he would inform Kramer of this discussion and request Kramer to contact Liaison Agent as soon as specific data needs are determined.

ACTION:

For information. If not contacted by Kramer sooner, Liaison will contact him during latter part of week of May 10, 1959, for specifics in above regard.

SAC, Albany

May 15, 1959

PERSONAL ATTENTION

Director, FBI

DEFENSE PLANS -
OPERATION ALERT 1959
LOGISTICAL INFORMATION

Enclosed for each office are three copies of a questionnaire regarding logistical information requested by the General Services Administration (GSA) in connection with its role in Operation Alert 1959. After execution, two copies of the questionnaire should be returned to the Bureau and one copy is to be retained in field office files. The questionnaire should be appropriately filled out and neatly typed as one copy will be transmitted by the Bureau to GSA.

Instructions for executing the questionnaire are as follows:

- (1) At the top insert the name of the field office and immediately thereunder the address and city wherein the office is located.
- (2) After "Relocation Site" insert only the city and state where your relocation site is located. Do Not List The Address, Building, Or Facility.
- (3) Insert figures denoting the estimated minimum number of personnel who would occupy your relocation site on D Day (day of attack), D+30 (30 days after attack), D+60 (60 days after attack), and D+90 (90 days after attack).
- (4) Insert the amount of total square feet of space available to your office at the relocation site.
- (5) Insert figures denoting the additional square feet of space which would be needed in the area of your relocation site on D+30, D+60, and D+90. The figure used will be the difference between the total square feet of space now occupied by you at headquarters city and the total square feet of space available at your relocation site. The same figure should be used for D+30, D+60, and D+90.

Memorandum Roach to Belmont 5-1-59 advised General Services Administration (GSA) desired certain logistical information regarding FBI requirements in connection with GSA's participation in Operation Alert 1959. GSA intended to obtain this information by having its regional offices contact our field offices.

Paul Foreman, Mobilization Planning Officer, GSA, advised Liaison Agent Fields 4-30-59 that Murray Kramer, Mobilization Planning Officer, Region 3, GSA, would know specific data desired from FBI within about two weeks. Foreman stated he would instruct GSA regions not to contact our field offices as information would be obtained from the Bureau.

Kramer was contacted 5-14-59 by Fields regarding logistical information desired. GSA regions had been advised not to contact our field offices. Kramer advised data desired pertaining to the Bureau and our field offices is as follows:

1. List of FBI offices, including SOG, which would relocate to another site in event of emergency.
2. Location of such relocation sites, (City will be sufficient.)
3. What would be the minimum number of personnel at each relocation site on D-Day (day of attack), D + 30 (30 days after attack), D + 60 (60 days after attack), D + 90 (90 days after attack).
4. In regard to each case of a relocating office, how much space (square feet) do we now have, and is it sufficient.
5. Assuming the above-listed offices did relocate, how much additional space would we need in each relocation site area on D-day; D + 30; D + 60; and D + 90.

Memorandum Roach to Belmont
RE: DEFENSE PLANS - OPERATION ALERT 1959
GSA REQUEST FOR LOGISTICAL INFORMATION

6. What projected demands or estimates for items other than normal supply (normal supply includes office and janitorial supplies, furniture, messing equipment, sleeping material and rations) would be needed to enable the FBI to carry out its assigned functions without interruption. Regarding this question, Kramer realized we would normally obtain supplies, equipment, machines, etc. through our own sources, but for Operation Alert 1959. exercise, GSA would like to know any such items which it might be able to supply under emergency conditions.*

OBSERVATIONS:

This is a legitimate request in connection with a Presidential program and it is necessary that we comply with it. The information requested in Items 1, 2, and 6, can readily be compiled at the Bureau. However, information requested by Items 3, 4, and 5, is not available at the Bureau since there has never been any need to require field offices to compile such information for our defense planning purposes. It appears desirable, in order to comply with GSA's request as accurately as possible, to submit an appropriate questionnaire to each field office for execution, return to the Bureau, and subsequent transmittal to GSA. The information required by question number 6 will be compiled by Mr. Newman of the Administrative Division, and the information required as it pertains to the Seat of Government will be compiled by the Defense Plans Desk.

RECOMMENDATION:

That attached circular letter, enclosing an appropriate questionnaire be sent to each field office.

Reference is made to the attached memorandum from Mr. Roach to Mr. Belmont dated May 14, 1959, on the above subject outlining the information desired by the CSC with regard to Bureau personnel and recommending that the Defense Plans Desk in coordination with the Administrative Division compile the figures and submit for approval to furnish telephonically to CSC.

There is attached a tabulation showing the following information:

1. Personnel on duty pre-attack (by Field Offices, Seat of Government, and total). This takes care of Items 1 and 2 in Mr. Roach's memorandum.

Note: The figures shown reflect the personnel actually on the rolls March 31, 1959.

2. Number of survivors after attack. This covers Items 3 and 4 in Mr. Roach's memorandum.

Note: The figures shown were computed by deducting the estimated injured and dead employees obtained during Operation Alert 1958 (furnished by Mr. J. T. Minnich, Defense Plans Desk) from the personnel shown in the first column of tabulation.

3. Estimated total manpower needs. This covers Item 5 in Mr. Roach's memorandum.

Note: The figures shown under this column reflect the Bureau's peak employment (during the Korean hostilities) of 14,656 employees, the breakdown by Field Divisions being based upon the personnel

At 4 p.m. on 5-14-59 Mr. Michael Levine, Code 129, extension 4547, who is mobilization readiness advisor for the Civil Service Commission (CSC), telephonically contacted Supervisor Minnich, Defense Plans Desk, Liaison Section, and advised as follows:

CSC is conducting for the Department of Labor a manpower survey in connection with Operation Alert 1959. CSC is requesting each agency and bureau to submit figures as follows:

1. Total personnel on duty pre-attack which would be prior to April 17, 1959.
2. Total personnel on duty in each field establishment covered by each of 8 Office of Civil and Defense Mobilization (OCDM) regional offices pre-attack.
3. Total number of survivors after the attack based on the damage analysis figures used during Operation Alert 1958.
4. Total number of survivors in each field establishment covered by each of the 8 OCDM regions.
5. Total manpower needs of the agency 30 days after the attack and 90 days after the attack.

Levine said CSC will furnish this information to the 8 OCDM regional offices where it will be studied and appropriate actions considered in connection with Operation Alert 1959. He said that he only required the gross approximate figures and that since the figures were only required for exercise purposes, they would not be put to any official use. He advised that Mr. Canavan

Memorandum Roach to Belmont
RE: DEFENSE PLANS-OPAL 1959
MANPOWER SURVEY BEING CONDUCTED
BY CSC FOR THE DEPARTMENT OF LABOR

(Defense Plans Coordinator, Department of Justice) is working up the figures for the Department, excluding the FBI and this is Levine's reason for directly contacting us.

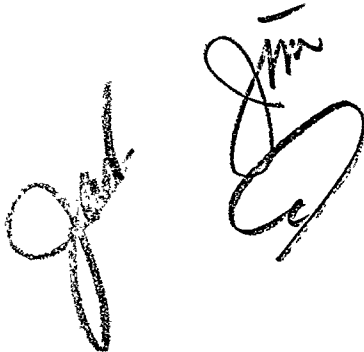

Levine said that these figures should be furnished to him telephonically and he would appreciate it if he could get them the early part of next week.

OBSERVATIONS:

These figures can be compiled without too much difficulty since the Laboratory did compute the probable killed and injured in our field offices in connection with Operation Alert 1958. Since this is an OCDM program it would appear that we should comply with this request so as to avoid any possible contention by OCDM that the FBI failed to furnish the necessary manpower figures in connection with Operation Alert 1959.

RECOMMENDATION:

It is recommended that the Defense Plans Desk, in coordination with the Administrative Division, compile the figures requested, submitting them for approval prior to telephonically furnishing them to CSC.

Memorandum Roach to Belmont 5-15-59 advised General Services Administration (GSA), in connection with its role in Operation Alert 1959 (O/A 59), desired certain logistical information by 6-5-59 regarding the Bureau and our field offices. The Director approved the compiling of the requested information by having the field offices execute a questionnaire in duplicate and return it to the Bureau for transmittal of one copy to GSA.

The questionnaire has been properly executed as follows:

- (1) Denotes the city and state wherein the relocation site of the field office is located.
- (2) Denotes the estimated minimum number of personnel who would occupy the site on D Day (day of attack) and 30, 60, and 90 days thereafter.
- (3) Denotes the total square feet of space available at each relocation site and the fact this amount is sufficient for immediate emergency responsibilities.
- (4) Denotes the additional square feet of space which would be needed in the area of each field office relocation site on D Day and 30, 60, and 90 days thereafter. The answer "None" on D Day is consistent for each office since each office has sufficient space to handle emergency functions on the day of an attack. The figure used for 30, 60, and 90 days thereafter is the difference between total square feet of space occupied by each field office in headquarters city and the square feet of space available at its relocation site.

Additionally, letter to GSA advises the Bureau and all field offices have plans to relocate and we have no projected demands or estimates for items other than normal supplies, since these items will be available through established sources.
